It also features intuitive LED indicators and a DIP switch for easy configuration and real-time status monitoring. The TP/FO alarm function enhances network reliability by providing alerts for link failures, enabling prompt troubleshooting.

Ideal Applications

With a 40Gbps internal fabric, support for 16K jumbo frames, and auto-negotiation capabilities, the SRC-5002SFP-MG-BT efficiently handles high-bandwidth data transmission in challenging environments. Its extended temperature tolerance makes it ideal for outdoor deployments, transportation systems, and other applications requiring stable operation under varying conditions.

As for the installation, this model offers flexible options— including **wall mounting**, **DIN-rail mounting**, and **magnetic mounting**— making it adaptable to various deployment scenarios.

Key Features

■ Ideal for environments characterized by substantial temperature fluctuations

The SRC-5002SFP-MG-BT boasts an extended temperature range, enabling operation from -20 to 60°C. This broad operational range allows it to thrive in environments characterized by fluctuating temperatures.

■ Flexible Applications: 10G/1G Fiber to Multi-Gigabit (10G/5G/2.5G/1G/100M) Ethernet

Featuring a 10G/1G SFP+ port and a 5-speed RJ-45 port (10G/5G/2.5G/1G/100M), it is perfect for instantly bridge the high-speed fiber network and various multi-gigabit devices with no additional setup, which is ideal for modern digital infrastructures, corporate networks, and any environment needing high-speed, reliable and flexible connectivity.

■ Automatic Speed Detection

Both the port and slot can automatically identify and adjust to the optimal speed for connected devices. This ensures seamless and efficient data transmission by matching the speed requirements, whether it's 100M, 1G, 2.5G, 5G, or 10G, without requiring manual configuration.

■ 3-pin relay output for hardware-based link loss alerts

The SRC-5002SFP-MG-BT includes a 3-pin relay output terminal that can trigger external devices such as buzzers or signal lights when a port link failure is detected. Supporting both normally open (NO) and normally closed (NC) configurations, it provides a simple and effective way to alert users of connection issues through physical signals.

■ Versatile Installation Modes

To adapt perfectly to diverse environments, it supports five types of installation modes: flat-type wall mounting, flat-type DIN-rail mounting, slim-type wall mounting, slim-type DIN-rail mounting, and magnetic mounting.

■ High-Power PoE for Simplified Deployment

The SRC-5002SFP-MG-BT supports IEEE 802.3af/at/bt standards, delivering up to 60 watts of power through the RJ-45 port. This enables direct power delivery to powered devices such as IP cameras, wireless access points, and other network devices, reducing cabling complexity and enhancing installation flexibility.

■ Target Applications

- Network infrastructures demanding 10 gigabit fiber to multi-gigabit Ethernet conversion with high-power PoE and wide-temperature operation, such as surveillance systems, transportation networks, and remote wireless deployments.
